the workflow:

we put the button to an interrupt pin to start the timers and depends on the timer the lights change.

timers:

- myTimer.after(900000,redLight_heatOFF);

  turn off the red led after 15 mins.

- myTimer.every(120000,greenLight_MixingON);

  flash the green led every 2 mins.

  (the green light flashes for 2 sec)

- myTimer.after(300000,WhiteLight_IngredientON);

  flash the white led after 5 mins.

  (the white light flashes for 10 sec)

- myTimer.after(600000,WhiteLight_IngredientON);

  flash the white led after 10 mins.
